15. Skimmer/Overflow System/Water Level
   A) Missing wiers. Each skimmer assembly shall have an automatically adjusting weir, and be kept in good repair. Repair/replace weir(s).
   B) Missing “o-ring” gaskets in float valves in skimmers located at far end of pool, near handrail, and closest to restroom. Each skimmer assembly shall have an air-lock protective device, and be kept in good repair. Replace “o-ring” gasket(s).

Each skimmer assembly shall have an automatically adjusting weir, an air-lock protective device, a removable and cleanable screen or basket, and be kept in good repair. [§116040, 116043, 3108B.4, 3110B.1]

### General Inspection Observations

Please be aware that the recommended service life for main drain and skimmer equalizer covers may vary depending on manufacturer. If your covers are older than this they can become brittle due to exposure from pool chemicals, heat, and other environmental conditions. Covers that are past their recommended service life should be replaced with approved covers and a new AB1020 compliance form must be completed and submitted by a state licensed contractor or engineer within 30 days of the installation. Should you have any questions on this, please contact your inspector.

### CLOSURE DIRECTIVE

The facility is hereby ordered to close in accordance with the California Code of Regulations, Title 22, Section 65545 and is to remain closed until written authorization to re-open is given by an authorized representative of Contra Costa County Environmental Health. Any posted closure signs are to be removed only by an authorized representative of Contra Costa County Environmental Health.

Once the violations that led to the closure have been corrected, contact this office at (925)-692-2500 to request a re-inspection.
