II. Introduction
(A). About Behavioral Health Services – A Division of Contra Costa Health Services
The Behavioral Health Services Division of Contra Costa Health Services combines Mental Health and Alcohol & Other Drugs (AOD) into a single system of care. With increasing challenges in serving complex populations with multiple needs, this integration is a response to the growing desire to have improved consumer outcomes through a systems approach that emphasizes "any door is the right door," and that provides enhanced coordination and collaboration when caring for the "whole" individual.

The mission of Contra Costa Behavioral Health Services, in partnership with consumers, families, staff, and community-based agencies, is to provide welcoming, integrated services for mental health, substance abuse, homelessness and other needs that promotes wellness,
recovery, and resiliency while respecting the complexity and diversity of the people we serve.

(B). Mental Health Services
Mental Health Services provides care to children, transition age youth, adults and older adults living in Contra Costa County. These services are provided through a system of care that includes county owned and operated clinics, community-based organizations, and a network of private providers.

Contra Costa children and adolescents are served by a County-wide system of care that includes mental health staff working in partnership with the Probation Department, Employment and Human Services Department, School Districts, and family members. Services for adults are provided to those with serious mental disabilities or those in acute crisis. Mental Health Services also includes a range of prevention programs oriented toward prevention of more serious mental health issues. The Contra Costa Mental Health Plan is the mental health care provider for Medi-Cal beneficiaries and the uninsured.

(C). About Mental Health Services Act
In November 2004, California voters passed Proposition 63, the Mental Health Services (MHSA). The MHSA is intended to "transform the public mental health system." The goal of the Act is to create a state-of-the-art, culturally competent system promoting wellness; recovery for adults and older adults with severe mental illness; and resiliency for children with serious emotional disorders and their families. With the advent of the integrated Behavioral Health Services Division described above and the onset of the federal Affordable Care Act, the MHSA funded community program planning process is a vital resource for assuring fidelity to the values contained in the Mental Health Services Act. The consultant leading the upcoming community forums needs to be aware of and include developments from these efforts into the planning process. To learn more about this County’s MHSA, please visit the Contra Costa MHSA site.

(D.) About the Consolidated Planning Advisory Workgroup
The Consolidated Planning Advisory Workgroup (CPAW) is a group of stakeholders that work together to provide input and make recommendations that help shape and continually improve the County’s public mental health system. CPAW has appointed members compiled of clients, their loved ones, service providers, and people in the community and is open to anyone interested in public mental health. CPAW members share input to assist in the ongoing development and evaluation of the programs and plan elements that comprise the MHSA Three Year Program and Expenditure Plan (Three Year Plan) and the annual updates. The group also advises on the integration of the values and principles inherent in the MHSA into this County’s public mental health system. Additionally, CPAW promotes transparency of efforts by sharing information with the stakeholder community.

III. Scope of Work
The purpose of this RFP is to contract with an individual or organization that will provide Suicide Prevention, Intervention, and/or Postvention mental health programming reflecting the values of the MHSA in Contra Costa County. The contractor’s proposal may include, but is not limited

The use of social media and other platforms are encouraged to expand outreach/educate about resources in new and innovative ways.

- **Access** – to reduce gaps in the system by including information in multiple languages, using culturally relevant tactics, and increasing collaboration between key players, as it is feasible in planning.

- **Special Considerations for Youth** – to better support the youth in our community by addressing gaps in services for youth experiencing suicidal ideation, special considerations for visits to psych emergency by youth, and follow up after the immediate crisis has subsided.

- **HIPAA Requirements** – Contractor must comply with the applicable requirements and procedures established by the Health Insurance Portability and Accountability Act (HIPAA) of 1996 and any modifications thereof.
