I. General Instructions
Contra Costa Behavioral Health Services (CCBHS) is seeking eligible organizations to apply for the Community Based Organization (CBO) Internship Program Request for Qualifications (RFQ). The scope of this RFQ will assist in the implementation of the Mental Health Services Act (MHSA) under the Workforce Education and Training (WET) component. The CBO Internship Program serves to fund CBOs that have an existing contract with CCBHS to recruit, train, and supervise graduate and master-level behavioral health intern(s) which are culturally and linguistically reflective of the communities served. The CBO shall provide internship opportunities to individuals pursuing a behavioral health related degree in the fields of social work, marriage and family therapist, and psychology. Additionally, the CBO shall provide stipends to the interns supported through this program.

Awards up to $30,000 may be granted per organization. Total distributed funds awarded shall not exceed $100,000. Primary use of funds should support intern stipends with some leverage to offset associated costs incurred in providing the internship.

The anticipated contract period shall be from November 1, 2021 through October 31, 2022. CCBHS reserves the option to adjust the contract amount of the awardee based on fiscal and/or time constraints. The awards shall be based upon the applicant’s successful experience and qualifications outlined through this RFQ. Upon approval from the Behavioral Health Services Director, CCBHS will move directly into contracting with the selected organizations.

(A). Minimum Qualifications to Apply
Eligible community-based organizations must meet all of the following minimum criteria to apply:

II. Introduction
CCBHS is a division of Contra Costa Health Services. CCBHS combines Mental Health and Alcohol & Other Drugs (AOD) into a single system of care. With increasing challenges in serving complex populations with multiple needs, this integration is a response to the growing desire to have improved consumer outcomes through a systems approach that emphasizes "any door is the right door," and that provides enhanced coordination and collaboration when caring for the "whole" individual.

(A). Mission of Contra Costa Behavioral Health Services
The mission of Contra Costa Behavioral Health Services, in partnership with consumers, families, staff, and
community-based agencies, is to provide welcoming, integrated services for mental health, substance abuse, homelessness and other needs that promotes wellness, recovery, and resiliency while respecting the complexity and diversity of the people we serve.

(B). Mental Health
Mental Health provides care to children, transition age youth, adults and older adults living in Contra Costa County. These services are provided through a system of care that includes county owned and operated clinics, community-based organizations, and a network of private providers.

Contra Costa children and adolescents are served by a County-wide system of care that includes mental health staff working in partnership with the Probation Department, Employment and Human Services Department (EHSD), school districts, and family members. Services for adults are provided to those with serious mental disabilities or those in acute crisis. Mental Health Services also includes a range of prevention programs oriented toward prevention of more serious mental health issues. The Contra Costa Mental Health Plan is the mental health care provider for Medi-Cal beneficiaries and the uninsured.

(C). About the Mental Health Services Act
In November 2004, California voters passed Proposition 63, the Mental Health Services Act (MHSA). The MHSA is intended to “transform the public mental health system.” The goal of the MHSA is to create a culturally responsive system, promoting wellness; recovery for adults and older adults with severe mental illness; and resiliency for children with serious emotional disorders and their families. With the advent of the integrated Behavioral Health Services Division described above and the onset of the federal Affordable Care Act, the MHSA funded community program planning process is a vital resource for assuring fidelity to the values contained in the MHSA. To learn more about this County’s MHSA, please visit the MHSA site.

(D). About the Consolidated Planning Advisory Workgroup
The Consolidated Planning Advisory Workgroup (CPAW) is a group of stakeholders that work together to provide input and make recommendations that help shape and continually improve the County’s public mental health system. CPAW has appointed members compiled of clients/ consumers/ peers, their loved ones, service providers, people in the community and is open to anyone interested in supporting the public mental health system. CPAW members share input to assist in the ongoing development and evaluation of the programs and plan elements that comprise the MHSA Three Year Program and Expenditure Plan (Three Year Plan) and the Annual Plan Updates. The group also advises on the integration of the values and principles inherent in the MHSA into this County’s public mental health system; with community collaboration, cultural humility, a client/family-driven mental health system, focused on wellness, recovery, and resiliency, and lastly an integrated service experience for clients and their families to address the changing needs of the public mental health system. Additionally, CPAW promotes transparency of efforts by sharing information with the stakeholder community. CPAW also serves as part of the Community Program Planning Process in this County.
