The Contra Costa Environmental Health Division of the Contra Costa County Health Services Department, acting as the Local Enforcement Agency (LEA), is certified by the California Department of Resources, Recycling, and Recovery (CalRecycle) to enforce state laws and regulations at solid waste sites within its jurisdiction. The Golden Bear Waste Recycling Center ("Facility") operates under Solid Waste Facility Permit No. 07-AA-0056, issued by the LEA on August 4, 2014. On May 13, 2021 the LEA received an application from the Facility operator for a modification to the Facility Solid Waste Facility Permit (SWFP) and an amendment to the Transfer Processing Report (TPR). The TPR, a document that describes the design and operation of a solid waste facility, is a required component of an application for a solid waste facility permit.

As required by Section 21660.1 of Title 27 of the California Code of Regulations, the LEA is distributing this notice for the purpose of noticing the intent to modify the SWFP and to amend the TPR for the Facility.

Description of Proposed Changes

The SWFP modification and TPR amendments change the landfill gas monitoring frequency at the Facility from weekly to quarterly in compliance with T. 27 section 20933. Monitoring Frequency.

LEA Determination

The LEA has determined that the proposed changes are acceptable and consistent with the applicable State Minimum Standards, do not conflict with the terms and conditions of the proposed modified Solid Waste Facility Permit, and are consistent with all certified and/or adopted CEQA documents in that no subsequent EIR or Negative Declaration or supplemental EIR is warranted. The LEA has determined that the proposed change to the SWFP does not result in any physical changes that would alter the approved design or operation of the Facility.

Pursuant to Section 21665(c) of Title 27 of the California Code of Regulations, the LEA has submitted the proposed modified permit and the TPR amendments to CalRecycle for concurrence in issuing the new permit. Once concurrence is received, the TPR amendments will be approved and the modified permit will be issued to the operator.
