

**County of Contra Costa
EMERGENCY MEDICAL SERVICES
Memorandum**

DATE: November 17, 2017

To: ALS/BLS EMS Providers & Contra Costa County Based Hospitals

FROM: Contra Costa County EMS Agency – Emergency Preparedness

SUBJECT: Bi-monthly Triage & Tracking Exercise – Phase I Completion (17-OPS-002)

Please be advised, effective November 17, 2017, the Triage & Tracking (T&T) Exercise – Phase I is complete

Provider agencies are no longer required to fill-out triage tags and/or enter triage tag numbers into ReddiNet. Based on EMS provider feedback and the recent revisions to the MCI Plan, we are reworking our T&T Phase II exercise objectives to greater align with current practices. The Phase II exercise will test the revised MCI Plan, emergency medical communication platforms, and patient documentation/tracking. We anticipate Phase II starting in the second quarter of 2018.

The Contra Costa County EMS Agency will be communicating and collaborating with key stakeholders as we continue to coordinate and revise our Phase II planning efforts.

We appreciate the provider agencies that participated in this on-going exercise and continually welcome your feedback and suggestions. Questions can be directed to Mateika Martin: Mateika.Martin@hsd.cccounty.us or at (925) 646-4690.
