

## Uniting Community Assets With Public Health A Group Exercise

Choose **two** people from your group—one to take notes and the other to report the findings later.

- **Note taker:** Use the sheet and record findings from your group.
- **Facilitator:** When the group reconvenes, report findings to the larger group.

What are the assets in this community?	Identify which chronic disease risk factor this relates to.	Using the assets you've identified, what community changes could you make?
