• After hearing from the providers and reviewing reports on the previous year’s project performance, the panelists made a ranked list divided into two tiers as mandated by HUD in the Notice of Funding Availability (NOFA)

         - Creation of a centralized list in HMIS that allows prioritization of the most vulnerable clients
         - Development of housing placement committees for individuals and families
       - Coordinated Entry Model:
         - Outreach teams, multiservice centers, and crisis call centers will assess individuals and families experiencing a housing crisis to determine if prevention/diversion is a viable option.
         - If short term assistance is appropriate, the consumer will be referred to centralized prevention services. If screened and not diverted, consumers will be referred to interim housing, and receive a VI-SPDAT assessment.
         - When housing options become available, a centralized housing placement committee comprised of service providers will
determine which clients are the most vulnerable while still being appropriate for the housing type using the VI-SPDAT scores.

- Once paired with a housing option, the consumer will be paired with a housing navigator to assist them as they make the final steps towards obtaining stable housing.
- Recognizing that the need for housing options is greater than what is available, housing locators will work towards recruiting landlords to participate in housing programs through the LEAP program
  - Next meeting: Monday 11/9, 2-3:30pm, Homeless Program Conference Room; topic: prevention and diversion at the beginning of our system
