30-DAY REPORT, PAGE 2
INCIDENT DATE: ______ 8/13/12 _______________
FACILITY: ____ Shell Martinez Refinery____________________

STATE AND DESCRIBE THE ROOT-CAUSE(S) OF THE INCIDENT:

The root cause of the leak was the deterioration of the viton main seat in SVJ-197. The deterioration was probably caused by the presence of H2S in the debutanizer overhead stream, which, over time caused a breakdown in the viton seat.
