REPORT:								
1/20/21: HW spoke to Candice at 510-690-6512. They can meet tomorrow. There are 2 buckets not leaking. 3:30pm Notified them that pick up is expected tomorrow 1/21 around 8:30-8:45am. No apparent restriction regarding pickup since they are outside. 1/21/21: AA & SD go to evaluate and pick up waste. 2-5gallon buckets with secured lids but some oil contamination on top, appears to be used oil. Chlor-D-Tect was negative. West County HHW did not answer phone call, so brought back to yard for bulking. Created Bill of Lading and Haz Waste Labels. Upon bulking some dried/older paint was found in bottom portion of buckets partially mixed in the oil as well as a bilayer on the full bucket. Additional testing suggests the bottom layer is water (pH 6, non oxidizer, miscible with water, negative acid test, HazMat ID identifies as 100% water, liquid is translucent with a yellow tint likely due to water soluble portions of the oil/paint). Oily Debris drum created to manage oil covered materials from incident (ex: buckets).
