REPORT:

10/08/2018: CCHSHMP received a call from Thomas Brooks of County Code Enforcement. He observed 6 1-gallon closed containers of waste oil on top of the storm drain grate at Pacifica Ave. and Anchor Dr. in Bay Point. CCHSHMP called County Public Works and asked if they can pick up the closed containers of waste oil. CCHSHMP was told that they no longer do that and that responsibility of picking up abandonments falls mainly on "Haz Mat." CCHSHMP contacted Con Fire Station 87 (Haz Mat) regarding the call and spoke with Captain Ken Loo. He said that he would have County Haz Mat dispatched to scene as well. At 13:32, CCHSHMP received the dispatch. Specialists Ellen Dempsey and John Pham took the call.

At 13:43, Dempsey and Pham departed the office for the scene in HM3/6868. Lead Trisha Johnson notified Con Fire Dispatch that County Haz Mat was en route to scene. When HM3 arrived on scene, Station 87 (Capt. Ken Loo, Capt. Chris Humphries, and Engineer Nick Vandenburg) was already on scene had done some technical analysis. Dempsey and Pham did not do any field analysis when they arrived. They picked up 6 5-quart containers of waste oil to bring back to the office. They departed from the scene at 14:18.

Back at the office, Dempsey and Pham performed the Chlor-D-Tect on a composite sample which consisted of aliquots from each of the containers. The Chlor-D-Tect found the level of chlorinated compounds in the composite sample to be very minimal that the waste oil can be properly disposed as normal.
