REPORT:

04/05/17

11:16 Ian Williams of CCHS-HMP departed Concord for 960 Oak Street, Clayton.

11:37 Ian Williams arrived onsite at 960 Oak Street, Clayton.

11:50 Ian Williams met with Laura Hoffmeister of the City of Clayton. The city representative identified the location of the dumping that occurred on April 4th as the High Street bridge over Mitchell Creek. A large amount of white, dried paint material was observed spilled on the bridge surface and on the vegetation above the creek. The creek was observed flowing steadily; 6 to 10 inches in depth. Directly below and downstream from the bridge, small and large white solids were observed, as well as a white film against the bank of the creek.

11:55 Ian Williams and Laura Hoffmeister walked downstream along the creek bank approximately 1000 feet to the confluence between Mitchell Creek and Peacock Creek. The contamination was identified as predominantly within 200 feet of the High Street bridge.

12:23 Contra Costa Fire Protection District Engine 11 arrived on scene. Ian Williams met with Captain Harless of CCCFPD and walked the site of the incident. CCCFPD recovered the following containers following the dumping: 4 x 1-gallon oil-based paint cans (empty), 1 x 5-gallon oil-based water sealer (empty), 1 x 1-gallon gasoline container (empty), and 1 x 1 quart motor oil (unopened). CCHS-HMP also walked the adjacent property at 995 High Street where the chemicals were obtained from a maintenance shed near Mitchell Creek.

12:50 CCHS-HMP departed the scene.

04/06/17

06:02 Ian Williams of CCHS-HMP departed the office in Truck HM4 for the Mitchell Creek spill location.

06:30 Ian Williams arrived at Mitchell Creek, began equipment setup.

07:00 Karine Abramians of CCHS-HMP arrived at the Mitchell Creek spill location. Areas for cleanup were identified between both sides of the High Street Bridge and downstream approximately 200 feet. Paint contaminated debris, as well as semi-solid globules of paint were shoveled out of the creek. Contaminated vegetation, rocks and soil from the banks of the spill location and downstream were removed. All materials were properly containerized in a 30-gallon ploy drum and properly labeled 'Oil-based Paint Contaminated Debris' before transport. Approximately 20 gallons of materials were removed from the creek. Following removal, CCHS-HMP walked the area of the spill a second time to confirm that all visible paint materials had been removed.

REPORT:

(...CONTINUED)

04/06/17

08:15 Ian Williams and Karine Abramians completed the clean-up work. All materials and loaded onto HM4.

08:35 CCHS-HMP departed Mitchell Creek for the office.

09:00 HM4 arrived at the office. The hazardous waste drum was placed in the hazardous waste storage yard.

04/07/17

10:30 Ian Williams and Karine Abramians departed the office in HM4.

11:00 HM4 arrived at Mitchell Creek and 995 Oak Street in Clayton.

11:10 CCHS-HMP met with Laura Hoffmeister of the City of Clayton and Chief Chris Wenzel of the Clayton Police Department. The group walked the area around the High Street bridge. The group then walked the West side of the property at 995 Oak Street. Directly North of the shed where the juveniles obtained the chemicals, an (estimated) 300 gallon tank believed to contain motor oil was observed. The tank appeared to be one third to half full. The tank was observed under an awning and up against a leaning cyclone fence directly above Mitchell Creek (see photos). A full oil pan was also observed under the awning. CCHS-HMP expressed concern regarding open access to the vacant property and the chemicals within the shed in the short term, and the potential for the tank and its contents to end up in Mitchell Creek as a long term concern. The City of Clayton to follow up with the land owner. CCHS-HMP to provide the City of Clayton with a list of waste contractor companies.

11:45 CCHS-HMP departed scene.

Additional Required Items: Bill of Lading, Request for Invoice, and Site Safety Plan
