Body Art Bloodborne Pathogen Training Checklist

The following are the requirements for the requirements for bloodborne pathogen training for body art practitioner. To be approved, a training must meet all of the following requirements:

- Trainer approved by local enforcement agency and is familiar with exposure control/infection prevention in body art facility.
- Training is specific to body art.
- Training is at least 2 hours.
- Training does the following:
 - Training provides a copy and explanation of the Bloodborne Pathogens Standard of California Division of Occupational Safety and Health (CCR Title 8 Section 5193).
 - Training provides a copy and explanation of any local body art bloodborne pathogen ordinances.
 - Training covers transmission, control and symptoms of bloodborne pathogen diseases.
 - Covers how specific tasks in body art practice can lead to exposure.
 - Covers personal protective equipment (PPE) use and limitations.
 - Covers task type, technique, and when to put on PPE in the process.
 - Covers hand hygiene with demonstrations.
 - Covers types, use, and storage of disinfectants and antiseptics.
 - Covers signage and labeling required for biohazardous materials, chemicals, and supplies.
 - Covers Hepatitis B vaccination information
 - Covers what is an exposure incident including:
 - Examples of exposures, how the exposures occurred, and actions to prevent future exposures.
 - Risk of infection following and exposure.
 - Post-exposure procedures, including medical follow-up.
 - Allows for question and answer time with the instructor.

****Please note that Contra Costa County Environmental Health does not endorse trainers.**
