A Vision of HOPE

Healthcare Partnership

"It's wonderful to know that my work will provide hope and healing for all mental health consumers who come through those doors."
"To be asked to be a part of change is a wonderful thing."

Consumer Feedback

Healthcare Partnership

“Our goal is to transform health care into a welcoming, accessible experience for all.”

"The joint Healthcare Partnership epitomizes the best of consumer/health care provider partnership. This process is what consumers/patient-driven services is really all about.” Brenda J. Crawford, Executive Director, Mental Health Consumer Concerns, Inc.

Become Our Partners

Partnering with patients and families in transforming healthcare into a welcoming, accessible experience for all.

No Medical Experience Required
Tell Us What You Think...

We’re Listening!

What can we do together to improve the health of our communities?

How are you as a patient or family member at the heart of all that we do?

If you could design it, what would the ideal health care experience look like?

Join us!

Be a part of a growing number of people dedicated to transforming health care. Have an equal voice in health care work groups and improvement teams. Help our hospital and health centers build better relationships between patients, families and health care workers. Also, help us build healthier communities.

Can I really make change happen?

Yes! Change can take place when people become aware of what needs to happen. You can make change happen by getting involved, giving your time and energy to the Healthcare Partnership and helping others get involved.

What are the responsibilities?

Willing to respect fully share your experiences and ideas. Respectfully listen to ideas that may be different from your own.

Willing to comfortably work in partnership with others to make changes that will positively affect patients, families and communities.

Willing to commit to scheduled committee meetings or work groups.
