

MONKEYPOX

STOP THE SPREAD. STOP THE STIGMA. KNOW THE RISKS.

Highest Risk

- Direct skin-to-skin contact with an infectious rash, scabs or body fluids
- Skin-to-skin contact while having sex with someone who either has monkeypox or has symptoms, such as a rash or blisters

Some Risk

- Sex with multiple partners
- Kissing or cuddling
- Dancing at a crowded party or club with skin exposed
- Sharing towels, bedding or clothing with an infected person

Unlikely

- Coworker-to-coworker transmission
- In public restrooms or on public transit
- At an airport or flying on a plane
- Touching doorknobs
- In a swimming pool or hot tub
- At a grocery store, coffeeshop or gym
