

CONTRA COSTA COUNTY REGIONAL BREASTFEEDING LIAISON (RBL)

CALIFORNIA WIC BREASTFEEDING VISION:

Breastfeeding is the norm for WIC mothers and their infants up to age one year and beyond.

WIC is known in the community as a source for breastfeeding assistance and information.

DID YOU KNOW?

THE CALIFORNIA WIC PROGRAM:

- Serves nearly 60% of all infants up to age one year and beyond.
- Supports Women to breastfeed their children.
- Impacts the future health outcomes of infants and children.

WHY AN RBL?

A need was identified for WIC to play a bigger role in facilitating seamless breastfeeding support in the communities in which WIC participants live.

To meet this need, the California WIC Program established the Regional Breastfeeding Liaison (RBL) program.

To increase breastfeeding initiation and duration rates, RBLs partner with hospitals, healthcare providers, employers, and the breastfeeding support community.

WHO ARE THE RBLs?

- WIC professional staff from a wide variety of public health, medical, and marketing backgrounds.
- Experts in breastfeeding and community collaboration building.
- Charged with narrowing the breastfeeding support gaps identified by the Breastfeeding Community Assessment conducted by local WIC agencies.

WHAT ARE RBLs DOING IN THE COMMUNITY?

The activities of the RBL are tailored to meet the needs of their community and local WIC agencies.

RBLs work within the four goal areas of the RBL program:

- Coordinate trainings to healthcare providers and healthcare staff on WIC's breastfeeding services and implementation of the "9 Steps to Breastfeeding Friendly Clinics: Guidelines for Community Health Centers and outpatient Care Settings, 2015," by the California Department of Public Health.
- Assist hospitals with implementation of the Baby-Friendly Hospital Initiative.
- Participate in coalition building and community collaboration.
- Assist employers with lactation accommodation in clinics, businesses and schools.

"Only through the support of family members, communities, clinicians, health care systems, and employers will we be able to make breastfeeding become the easy choice, the default choice."

The Surgeon General's Call to Action to Support Breastfeeding, 2011
