

Population Trends & Totals

Selected Cities and Places in Contra Costa County

Population Growth

There has been dramatic population growth in Contra Costa's East County communities.

Table 1. Population Growth in Selected Communities.
Contra Costa, 1990-2000

	% Growth
Brentwood	*208.1%
Antioch	*45.6%
Oakley	*39.4%
Bay Point	*23.4%
San Pablo	*20.1%
Pittsburg	*19.4%
Countywide	18.1%
Richmond	13.5%
Martinez	12.8%
Concord	9.4%
Pinole	9.0%
Walnut Creek	6.2%

* Indicates that the rate of growth in these six communities is greater compared to the county overall.

Contra Costa's population has grown by 18.1%

Five East County communities, Brentwood (208.1%), Antioch (45.6%), Oakley (39.4%), Bay Point (23.4%), and Pittsburg (19.4%) as well as the west county community of San Pablo (20.1%) had growth rates that were higher than the county's growth rate (18.1%).

The community of Brentwood more than tripled its population over the last 10 years, adding a total of 15,739 new residents. San Pablo (located in West County) has grown by 20.1%, adding 5,057 new residents during the last ten years.

Table 2. Number of New Residents by Community, 1990-2000

	2000 Pop.	1990 Pop.	New Residents
Antioch	90,532	62,195	28,337
Brentwood	23,302	7,563	15,739
Richmond	99,216	87,425	11,791
Concord	121,780	111,348	10,432
Pittsburg	56,769	47,564	9,205
Oakley	25,619	18,374	7,245
San Pablo	30,215	25,158	5,057
Bay Point	21,534	17,453	4,081
Martinez	35,866	31,808	4,058
Walnut Creek	64,296	60,569	3,727
Pinole	19,039	17,460	1,579
All Other Communities	360,648	316,815	43,833
Countywide	948,816	803,732	145,084

The largest increase in the number of new residents was in the city of Antioch (28,337).

Two East County communities (Antioch and Brentwood) represented 30.4% of the growth for the entire county, with a combined total of 44,076 new residents.

Richmond has grown 13.5% over the last 10 years with a total of 11,791 new residents.

Data sources

U.S. Census Bureau, Census 2000, Summary File 1, Table P1. U.S. Census Bureau, Census 1990, Summary File 1, Table P001

Residents without Health Insurance

It is estimated that nearly 1 in 10 Contra Costa residents age 18-64 years old do not have health insurance.

Table 3. Percent of residents age 18-64 years old that do not have health insurance 2001-2002

Places	% Uninsured
Contra Costa	9.3%
Bay Area Counties	13.9%
California	22.8%
Population Groups*	% Uninsured
Latino	30.7%
African American	15.0%
Asian	11.6%
White	7.8%
Bay Area Counties	13.9%

* Due to small number of survey responses, these race/ethnic estimates combine data from the nine Bay Area Counties: Alameda, Contra Costa, Marin, Napa, Santa Clara, San Francisco, San Mateo, Solano and Sonoma. Even after combining data from the nine Bay Area counties, we were unable to calculate Bay Area estimates for other race/ethnic groups, including Native Americans/Alaska Natives and Native Hawaiian/other Pacific Islanders.

Nearly **10%** of Contra Costa adults age **18-64 years lack health insurance**. This represents approximately **43,000 residents**. In comparison, nearly a quarter of California adults age 18-64 years do not have health insurance.

People of Color have the greatest risk of being uninsured

Among Bay Area residents age 18-64 years, **Hispanic/Latinos** and **African Americans** are **2 to 3 times more likely than Whites to be without health insurance**. National studies also find that Hispanic/Latinos and African Americans are more likely to be uninsured.

People with low incomes are much more likely to be uninsured

In a national survey of non-elderly Americans, more than half of those with incomes below the federal poverty level (60.9%) and between poverty and twice the poverty level (53.5%) were uninsured.

Many low-income working families without job-based health insurance earn too much to be eligible for government subsidized insurance programs like Medi-Cal or Healthy Families.

Research shows that people without health insurance are much more likely to be sicker and die earlier than those who have insurance. Children and families without health insurance put off visits to the doctor, and as a result tend to be sicker when they finally seek care. Without the care of a regular physician, families are more likely to go to the emergency room for treatment.

Data Sources and Methods

The estimates in this report were calculated using data from the California Health Interview Survey and scientifically derived multipliers from the California Health Care Foundation. These multipliers allowed us modify the CHIS estimates in order to provide more accurate high-end estimates for each group.

The California Health Interview Survey's AskCHIS data query system, copyright (c) 2003 the Regents of the University of California, all rights reserved, provided the foundation for calculating the estimates in this report. Data from the California Health Interview survey are available online at <http://www.chis.ucla.edu/>

(Note: The AskCHIS data are generated from a telephone survey that asks questions to a randomly selected group of adults in Contra Costa and other counties in California. Since these statistics are estimates, we do not recommend using them for evaluation purposes.)

Studies have found that health insurance levels from the California Health Interview Survey are under reported and that there are wider gaps between the estimates for certain groups, such as African Americans. To account for this, we used the California Health Care Foundation's multipliers to obtain more accurate high-end estimates for each group. There was no multiplier specific to Asians, so we used the 'other' multiplier for this group. We were unable to calculate confidence intervals or statistical significance for these estimates. For more information please see the California HealthCare Foundation's California's Uninsured and Medi-Cal Populations: A Policy Guide to the Estimates at <http://www.chcf.org>.

National comparisons from Families USA. One in three: Non-elderly Americans without health insurance, 2002-2003. Available online at <http://www.familiesusa.org>.

Information about eligibility for government subsidized health insurance programs from Contra Costa County Children and Families Policy Forum. Contra Costa County Children's Report Care: Health Insurance, 2003. Available online at <http://www.cocoschools.org/about/reptcard.html>.

Poverty

Nearly 20% of Contra Costa's residents live in poverty. In some communities the poverty rate is much greater

Table 4. Residents Living in Poverty.
Contra Costa Communities, 2000

	% Community Residents	Residents Living in Poverty
San Pablo	*42.8%	12,938
Richmond	*36.3%	36,047
Bay Point	*33.4%	7,188
Pittsburg	*28.5%	16,210
Concord	*20.9%	25,417
Antioch	*19.9%	18,015
Countywide	18.5%	175,065
Brentwood	15.5%	3,616
Oakley	14.6%	3,741
Pinole	12.7%	2,417
Martinez	11.8%	4,224
Walnut Creek	10.6%	6,797

[*] Indicates that the percent living in poverty is significantly higher in these communities compared to the county as a whole. We are 95% certain that these differences are not due to chance.

At least **175,065 Contra Costa residents live in poverty**. This represents 18.5% of the county's population.

San Pablo (42.8%), **Richmond** (36.3%) and **Bay Point** (33.4%) **have the highest percentages of poverty** - each of these communities with at least one-third of their residents living in poverty.

The largest number of poor residents live in Richmond (36,047), followed by **Concord** (25,417).

We define poverty as 200% of the Federal Level

Because of the high cost of living in Contra Costa County, we have calculated poverty rates to include all county residents who reported a gross income less than 200% of the Federal Poverty Level. In the year 2000, this amount ranged from \$16,700 for a person living alone to \$34,100 for a family of four and \$57,300 for a family of eight.

Confidence intervals are available

Data source

U.S. Census Bureau, Census 2000 American FactFinder, Summary File 3, Tables P88.

Education

Nearly 13% of Contra Costa’s residents lack a high school diploma. In San Pablo and Bay Point, the rates are more than twice as high.

Table 5. Educational attainment (percent) for residents age 25 & over.
Contra Costa County 2000

	No high school diploma	High school diploma ^[1]	Some college	College graduate ^[2]
San Pablo	*37.6%	26.1%	25.9%	10.4%
Bay Point	*28.2%	26.5%	33.2%	12.1%
Richmond	*24.6%	21.8%	31.2%	22.4%
Pittsburg	*24.3%	25.9%	35.1%	14.7%
Brentwood	*17.1%	25.4%	36.6%	20.9%
Concord	*15.3%	23.2%	35.6%	25.9%
Oakley	*15.2%	30.4%	40.7%	13.7%
Antioch	*14.3%	28.6%	38.9%	18.2%
Countywide	13.1%	19.8%	32.1%	35.0%
Pinole	11.7%	24.2%	36.5%	27.6%
Martinez	8.9%	20.3%	38.7%	32.1%
Walnut Creek	5.1%	12.6%	28.4%	53.9%

^[1] Includes GED recipients

^[2] Includes graduate school and higher educational attainment

^[*] Indicates that the percentage of residents age 25 and over who do not have a high school diploma is greater in these communities compared to the county overall.

The differences starred (*) above are statistically significant. This means that we are 95% certain that these differences are not due to chance.

At least **81,867 residents lack a high school diploma**. This represents 13.1% of the County's population.

San Pablo, Bay Point, Richmond and Pittsburg have the lowest rates of educational attainment.

More than half of Walnut Creek residents (53.9%) are college graduates.

Table 6. Educational attainment (number) for residents age 25 & over. Contra Costa County 2000

	No high school diploma ^[1]	High school diploma	Some college	College graduate ^[2]
Richmond	15,446	13,672	19,526	14,018
Concord	12,244	18,560	28,563	20,763
Pittsburg	8,126	8,632	11,716	4,914
Antioch	7,735	15,480	21,015	9,811

Martinez	2,251	5,111	9,748	8,091
Pinole	1,531	3,150	4,764	3,600
Countywide	81,867	123,956	200,770	219,048

^[1] Includes GED recipients

^[2] Includes graduate school and higher educational attainment

[*] Indicates that the number of residents age 25 and over who do not have a high school diploma is greater in these communities compared to the county overall. The differences starred (*) above are statistically significant. This means that we are 95% certain that these are true differences and not due to chance alone.

The largest numbers of residents lacking a high school diploma live in the cities of Richmond (15,446) and Concord (12,244).

The largest number of college graduates live in Walnut Creek (26,971).
